EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Kerr on July 11, 2006.

The application has been amended as follows:

Claim 1 has been amended to incorporate the limitations of claim 2.

--Claim 1. A spherical, luminescent golf ball comprising:

a spherical outer layer of a translucent polymer material, allowing for transmission and diffusion of light, said spherical outer layer having a first spherical center;

a substantially inner chamber comprising a first hemisphere having a first liquid compound, a second hemisphere having a second liquid compound, and a planar circular portioning element configured to border said first hemisphere and said second hemisphere;

said planar circular partitioning element separating said first hemisphere and said second hemisphere, said planar circular partitioning element configured to rupture when sufficient external force is applied to said golf ball, thereby allowing said

Art Unit: 3711

first liquid compound and said second liquid compound to mix and form a chemiluminescent liquid mixture that produces light energy;

a cord coupled to the planar circular partitioning element, said cord configured to provide said sufficient external force to said ball by mechanically displacing and rupturing said planar circular portioning element; and

said substantially inner chamber having a second spherical center that coincides with the first spherical center of the spherical outer layer, which is configured to provide substantially even weight distribution through said ball.--

Claim 2 has been cancelled.

Allowable Subject Matter

Claim 1 is allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest a golf ball having a cord for rupturing a partition to create a chemiluminescent mixture within a golf ball.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
